

INTOUCH®

ECO  FRIENDLY

PRODUCT CATALOGUE 2023

#TogetherWeCanMakeADifference

A WORD FROM OUR CEO

Over the past 27 years I have been blessed with the privilege of working with some outstanding brands in the mobile accessories industry. During this time I have learned so much about what is important in a brand or product, from the values of the brand to how it is positioned, but most importantly what a brand's vision is for the future.

This is when I got thinking, there was not enough planning for the future put into the brands I so loved. I wanted more...I wanted innovative, high quality products that are well priced, that did not harm the environment.

This is where INTOUCH was born. I

wanted a brand that had the future in mind, a future for our children and their children. A plastic free future.

When we first put our pens to the drawing board, we wanted to go the ECO-Friendly route. After some financial research, we realised that sadly, it was not feasible for us to break into the market with the ECO range. We needed to launch our brand and let the world know about us first!

MEANWHILE... we have been working hard to get our range of ECO-Friendly packaging out there and are proud to announce, we have finally done so! Our packaging is made from 100% recycled materials and are working towards a plastic free brand.

We would like to thank you for your support and your commitment in making the INTOUCH brand what it is today, especially during this hard time. We know that...Together we CAN make a difference!

Our vision is to provide innovative, forward thinking products for everyday life. We strive to extend this forward thinking to the whole planet with our eco packaging. We want our children, and their children, to experience the same thrills of discovering nature and pushing their limits. We hope that other brands follow in these footsteps.

#TogetherWeCanMakeADifference

ABOUT US

Intouch is a **new** and **exciting brand** of **accessories** with fantastic products, ranging from power banks, cables, audio, right through to smart home.

The **Intouch** brand has **grown at a phenomenal rate** and is fast becoming one of the leading brands of accessories in the South African market. Now available in all leading MTN, Vodacom, Cellucity and Chatz retailers. Global sales have also skyrocketed with us breaking into New Zealand, Australia, Chile, Mexico, Peru and many more.

NEW ECO-FRIENDLY PACKAGING

Intouch recognises that our operations and products have an impact on the environment and we believe in a responsible approach to mitigating these impacts.

We aspire to **infuse sustainability** into our day-to-day work across the company, so that it shapes our thinking and the way we do business.

This is truly reflected with our **New Eco-Friendly packaging**, made from **100% recycled materials**. We have **moved away from using any plastics** on our packaging as this has become a massive issue in todays times.

We are proud to identify as pioneers in the accessories industry in South Africa moving to **eco-friendly packaging**. We hope more brands, especially the larger ones follow in our footsteps.

BIODEGRADABLE COLLECTION

NEW QR CODE SCANNING FEATURE

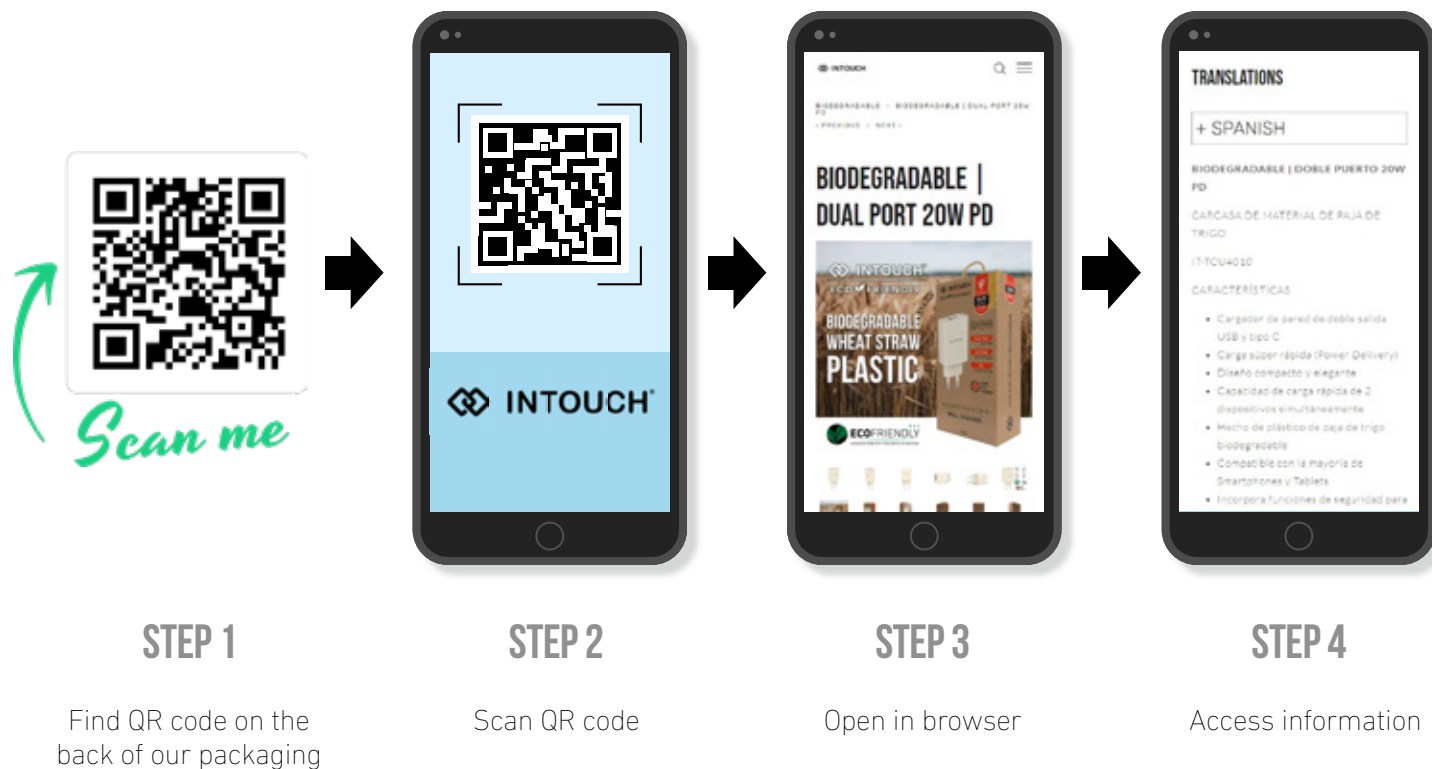

Here at Intouch, we are constantly working to better our services by keeping up with the latest technologies to not only improve our products and services, but to also lower our carbon footprint.

This is why we have introduced our new QR code feature, creating an experience via a digital platform where we can effectively cater for our global market.

This will allow us to better our interaction with our customers, not only giving our customers more information on our products, but allowing us to display this information in multiple languages. This in turn cuts down on our print runs, reducing our carbon footprint thus aligning with our core vision of an eco-friendly conscious brand.

HOW TO USE OUR QR CODES

BIODEGRADABLE

BIODEGRADABLE RANGE MADE FROM WHEAT STRAW PLASTIC

Here at Intouch, we are constantly trying to evolve with today's fast pace but at the same time, keeping in mind our impact on the environment. This new journey we are on is a first in the accessories business and we do hope that more will follow. We are very proud to present our new Biodegradable Range, made from Wheat Straw Plastic.

WHAT IS WHEAT STRAW PLASTIC?

Wheat straw plastic is the latest eco friendly material and is a smart, environmentally friendly alternative to plastic. It is a premium food grade material and is completely BPA free and has FDA approval. The impact of regular plastic on the environment is devastating, and wheat straw plastic is an awesome alternative.

It is made from a by-product of wheat production, namely wheat straw. It has many applications like wheat straw food containers, wheat straw drinking straws, wheat straw plastic plates, reusable coffee cups and many more.

So what is wheat straw material? Wheat is a type of grain that is used to make flour, bread and wheat derived products like pasta. Wheat straw is the by product that is left over after the wheat harvest, and by using it to make a plastic like substance, it is an ideal zero waste option.

Wheat straw contains cellulose and by breaking it down, a new product can be created. The process creates the opportunity to make different kinds of polymers. Natural polymers are found in our bodies, like hair and nails. Plastic is made from artificial polymers, but polymers created from wheat straw, are completely natural.

TRIPOD GRIP STABILIZER

- Three-sided cradle keeps your sensitive electronic devices firmly in place while still allowing full function. Remove your device easily and quickly with a push-button release.
- Adjustable design for multiple angle shooting, the angle shooting is stable.
- Compact, Foldable, Durable and Lightweight: Strong, sturdy grip thanks to rubber-reinforced, metal insertion blade. Super-tight but simple blade system involves just a thumbscrew and tightening wheel.
- High Compatibility: Adjustable phone stand compatible with all brands and devices with any case (such as for Apple iPhone, Samsung, and other Android Smartphones).

LED RING LIGHT

- With the LED Selfie Ring Light you will never have to worry about dark environments again.
- 36 LED bulbs provide supplemental or side lighting for photography in low light conditions.
- Rechargeable with USB Cord: This ring light includes a built-in rechargeable battery which charges via a micro-usb cable so you do not need extra batteries.
- Adjustable Brightness: Three-level light settings for various uses -- make-up, selfie photos, dark scenery vlogging etc.
- Compact & Lightweight: Pocket sized, extremely compact. Take it with you anywhere you go.

WHAT'S GAN AND WHY DO YOU NEED IT?

Here at **Intouch**, we are **proud to announce** the **release** of our **New GaN PD Chargers**. This range consists of **2 high quality and high-performance GaN Technology, Power delivery charging solutions**.

GaN tech chargers, like the **Intouch GaN Chargers**, are the **newest types of chargers** in the market and they offer **several benefits** over traditional chargers. For one, they're **much faster**, so you can **charge your devices in a fraction of the time**.

WHY ARE GAN CHARGERS BETTER THAN ORDINARY CHARGERS?

You may be wondering if a GaN charger is worth the investment. After all, there are a lot of chargers on the market and they all seem to do the same thing. So, what makes a GaN charger better than an ordinary charger?

The answer lies in the technology behind the charger. GaN, or gallium nitride, is a semiconductor material that is more efficient than silicon. Silicon is the material used in most electronics. It is a good conductor of electricity but is not as fast or efficient as GaN.

GaN chargers can charge devices faster because they have a wider bandgap (Silicon has a 1.12 eV bandgap, while Gallium Nitride has a 3.4 eV bandgap). This means there is less energy loss as electrons move from one band to another. Gallium nitride's wider band gap allows it to sustain higher voltages and temperatures than silicon MOSFETs.

INCREDIBLY FAST SPEED

If you're always on the go, you need a charger that can keep up with your busy lifestyle. GaN chargers charge devices up to 3 times faster than traditional chargers. You can fully charge your dying phone in less than an hour. No more waiting around for your phone to charge!

SMALLER FOOTPRINT

If you don't like chargers that take up too much space, you'll love GaN chargers. Because they're made with a more efficient semiconductor material, they are smaller and more compact than traditional chargers. They won't take up much space in your bag or purse.

MORE ENERGY EFFICIENT

GaN chargers are also more energy-efficient than traditional chargers. They use less power which is better for the environment. High efficiency means less heat is generated. You'll also save money on your power bill. Win-win!

NEW

ECO-FRIENDLY PACKAGING

Here at Intouch, we recognize that our operations and products have an impact on the environment, and we believe in a responsible approach to mitigating these impacts.

We aspire to infuse sustainability into our day-to-day work across the company, so that it shapes our thinking and the way we do business.

This is truly reflected with our New Eco-Friendly packaging, made from 100% recycled materials. We have moved away from using any plastics on our packaging as this has become a massive issue in today's times.

We are proud to identify as pioneers in the accessories industry in South Africa moving to eco-friendly packaging. We hope more brands, especially the larger ones follow in our footsteps.

ECOFRIENDLY

PACKAGING MADE WITH 100% RECYCLED MATERIAL
